PROFILE SUMMARY

Senior Laravel Developer with 4+ years of experience building, maintaining, and optimizing scalable web applications. Strong expertise in Laravel, PHP, RESTful APIs, database design, and admin/user panel development, with working experience in Node.js, React.js, and Inertia.js. Successfully delivered 100+ projects including live production systems, AI-powered tools, appointment booking platforms, and international business applications. Proven ability to collaborate with cross-functional teams and deliver production-ready solutions.

SKILLS / CORE COMPETENCIES

Backend: PHP, Laravel, CodeIgniter, MySQL, PostgreSQL, Node.js, Express.js, RESTful APIs, JWT & OAuth Authentication

Frontend: React.js, Inertia.js, HTML5, Redux Toolkit, CSS, JavaScript (ES6+), Bootstrap, jQuery

Tools & Platforms: AWS (EC2, S3), CI/CD (GitHub Actions), Git & GitHub, Postman, OpenAI API

Core Expertise: State Management, Reusable Component Architecture, Performance Optimization, Debugging, Problem Solving

WORK EXPERIENCE

Laravel / Full Stack Developer — Canws Technologies *Present*

- Backend-focused Laravel development for live and scalable applications.
- Designed and developed RESTful APIs for web and mobile platforms.
- Managed Admin Panels, User Panels, and role-based access control.
- Implemented business logic, database relationships, and performance optimization.
- Integrated frontend using React.js and Inertia.js.
- Fixed bugs, enhanced features, unit testing, and optimized code.
- Supported production deployments and live monitoring.

Laravel Developer — Codobux IT Services *Aug 2022 – Previously, Mohali*

- Developed and maintained international and domestic Laravel applications.
- Built reusable modules, REST APIs, and admin dashboards.
- Worked with Node.js services and third-party API integrations.
- Optimized database queries and improved application performance.
- Collaborated with project managers and designers to meet requirements.

EDUCATION

- Vivekananda Global University — MCA (Master of Computer Applications)
- KUK University — Bachelor of Commerce, Naraingarh, India
- Govt. Sen. Sec. School — Intermediate (12th), Naraingarh
- S.M.B. Geeta Sr. Sec. School — High School (10th)

PROJECTS

Freelance Driver & Chauffeur Booking Platform

Laravel, Node.js/Socket.IO, Stripe Connect, Twilio, Firebase, Google Maps API

- Built an on-demand and scheduled ride dispatch system with OTP verification and route optimization; booking drop-offs fell by around 35%.

- Integrated Stripe Connect for split payouts, driver subscriptions, and automated cancellation/refund penalties.
- Added real-time chat via Socket.IO, Twilio voice, FCM push notifications, and live flight tracking for airport pickups, which sped up communication response by roughly 45%.

Luxury Nightlife & Hospitality Discovery Directory

Laravel 10, JavaScript, AJAX, Bootstrap 5, Google Maps API

- Built a venue directory with multi-attribute search, geo-filtering, and Google Maps routing that lifted discovery and engagement by about 40%.
- Engineered an async media pipeline for image and video galleries with automatic cleanup, cutting processing time by close to 35%.
- Delivered an RBAC admin suite with cascading taxonomy management, reducing moderation overhead by around 50%.

On-Demand & Subscription Laundry Logistics Platform

Laravel, Node.js/Socket.IO, Stripe, PayPal, Apple Pay, React/Inertia.js

- Architected a pickup/delivery pipeline with role-based state machines and QR chain-of-custody tracking, bringing fulfillment errors down by about 35%.
- Built a multi-gateway billing system across Stripe, PayPal, and Apple IAP with bag-credit and add-on billing.
- Added real-time multi-party chat with FCM notifications, speeding up support resolution by roughly 45%.

Cashira — AI Smart Calendar & Task Planner

Laravel 10, OpenAI GPT, Vapi AI, Firebase, Apple/Google IAP webhooks

- Built an AI scheduling engine using Vapi Voice AI and GPT for conversational event booking, cutting manual scheduling by close to 40%.
- Automated cross-platform subscription billing through Apple and Google webhook integrations with zero discrepancies.
- Developed real-time push alerts synced to cron workers, improving task adherence by about 35%.
